Adobe 101: New to Adobe? Start here!

Expand the visual to the right to see where we compete! Adobe offers three primary suites of software solutions: Creative Cloud (for creatives and designers), Document Cloud (for business users), and Experience Cloud (for marketers). Salesforce

competes directly with the Marketing, Commerce, Data and Personalization products within the **Adobe Experience Cloud** portfolio, including the next-gen apps natively built on **Adobe Experience Platform**.

Adobe 101: Mapping where we compete			
Category	Adobe	salesforce	Compete Scenario
B2C Cross-Channel Marketing: Batch Campaigns	Legacy Campaign Standard or Campaign Classic v7	MC Engagement+	Rip & Replace
	Journey Optimizer and/or Campaign v8	MC Engagement+	Head-to-Head

B2C Competition:

Marketing Cloud Next vs Adobe Campaign & Journey Optimizer

WHAT IS ADOBE CAMPAIGN?

Adobe Campaign is a **B2C cross-channel marketing platform** that helps businesses design, execute, and manage automation workflows for **batch marketing campaigns** across Email, SMS, Push, and Direct Mail channels. There are multiple versions in use by Adobe customers (Standard, Classic v7, and Classic v8), which are a remnant of Adobe's legacy acquisition of Neolane and subsequent attempts at replatforming.

WHAT IS ADOBE JOURNEY OPTIMIZER?

Adobe Journey Optimizer (AJO) is an **omnichannel orchestration and personalization platform** built on top of the Adobe Experience Platform (AEP). It enables marketers to design, execute, and optimize individualized real-time journeys across various touchpoints, including email, SMS, push, in-app messages, web, and more.

When do we compete with Campaign and Journey Optimizer?

- Campaign Standard, Campaign Classic (v7), or Campaign Managed Cloud Services (v8) - legacy incumbent in rip & replace opportunities
- Journey Optimizer - standalone head-to-head competitor when customer doesn't already have Adobe Campaign

Two ways to get to know Adobe Campaign on a deeper level:

- Read the [Adobe Campaign Product FAQ](#) to learn more about the multiple versions of Campaign (Standard, v7, and v8), Adobe's migration plans for their legacy products, how Campaign compares to Journey Optimizer, and why someone would rip & replace Campaign and switch to Salesforce.
- Try using the Sales Agent to ask specific questions about Adobe Campaign. Click/tap the prompts to the right to get started!

Two ways to get to know Adobe Journey Optimizer (AJO) on a deeper level:

- Read the [Journey Optimizer Product FAQ](#) to learn more about how our features compare, what our differentiators are vs AJO as well as Adobe's pricing and packaging, strengths and weaknesses.
- Try using the Sales Agent to ask specific questions about AJO. Click/tap the prompts to

the right to get started!

B2B Competition:

Marketing Cloud Account Engagement + PSL vs Marketo

Marketing Cloud Advanced OR Marketing Cloud Account Engagement + PSL vs Adobe Journey Optimizer B2B Edition

WHAT IS MARKETTO?

Marketo is a legacy B2B marketing automation platform designed for nurturing and managing individual leads. To get access to any new innovations and product enhancements, customers must migrate to the Adobe IMS for a unified experience on Adobe Experience Cloud.

WHAT IS JOURNEY OPTIMIZER B2B?

Adobe Journey Optimizer B2B Edition is *not* designed as a standalone Marketo replacement but rather as an orchestration layer intended to work with Marketo. Journey Optimizer B2B is designed to orchestrate customer experiences at the account and, more specifically, the buying group level. Despite sharing the name 'Adobe Journey Optimizer', it is a completely separate product from the *other* AJO.

When do we compete with Marketo and AJO B2B?

- Legacy Marketo - incumbent in rip & replace opportunities
- Marketo Engage on Adobe IMS + AJO B2B - head-to-head competitor combination when the customer is looking for a solution that can manage the full lifecycle (acquisition through retention) of both individual leads and accounts or buying groups

Two ways to get to know Marketo and AJO B2B on a deeper level:

- Read the [Marketo & Adobe Journey Optimizer B2B Product FAQ](#) to learn more about what the difference is between the two, Adobe's migration and go-to-market plans with the two products, Marketo's shortcomings and roadmap plans with its CRM integration, and why companies are switching from Marketo to Salesforce.

- Try using the Sales Agent to ask specific questions about AJO. Click/tap the prompts to the right to get started!

Data Cloud

Data Cloud vs Adobe Real-Time CDP

Adobe Real-Time CDP is Adobe's customer data platform, built on Adobe Experience Platform (AEP). AEP handles the data ingestion while Real-Time CDP leverages AEP's Identity Service to provide real-time identity resolution and unified customer profiles. The profiles can be enriched and segmented into audiences in real-time and used for marketing campaigns and other activations to Adobe & non-Adobe destinations.

Adobe has [multiple editions](#) of their CDP:

- B2C edition for brands wanting to personalize experiences for consumers
- B2B edition for brands wanting to personalize for leads and accounts
- B2P edition for combined B2C & B2B brands who need to personalize experiences for the same person across all lines of business

Two ways to get to know Adobe Real-Time CDP on a deeper level:

- Read the [Adobe Real-Time CDP Product FAQ](#) to learn more about RT CDP's strengths and weaknesses, its pricing and packaging and how its different from ours, how our features compare,

and what Data Cloud's differentiators are compared to Adobe.

- Try using the Sales Agent to ask specific questions about AJO. Click/tap the prompts to the right to get started!
